Math. 4:4 Isaiah 8:20

old doesn't mean more reliable

Does old mean good? most people equate "old" with "good"
 ↳ Not totally

(ONLY 2 STREAMS OF BIBLES)

Origen - freemason - textual critic, correcting many sacred manuscripts. Evidence suggests he changed them to agree with his own philosophy of mystical & allegorical ideas "Les Garret, 1982, "Which Bible can we Trust" pg. 16"

- He believes man was ~~made~~^{divine} therefore there ought to have been more than 1 divine man - Masonic teaching
 From the Birth of Christ (~400 A.D) Gnostic gospels/other writings were written. Paul mentions this in 2 Cor. 2:17

WHERE PROBLEM REALLY STARTS:

↳ IN 331 A.D constantine ordered the "ecumenical Bible" be written. Eusebius, a follower of Origen, was assigned this task. Eusebius rejected Christ as a deity & claimed Christ was a created being. This error is called Arian

HERESY

The Argument is Not:

"KJV vs other versions" It is

"Received text vs other manuscripts"

The early Christians rejected those writings because they knew they were false, so they went away into secret libraries and eventually dug up & found as "ancient manuscripts" they landed in Rome & Alexandria - where all esoteric studies flourished - found around 50 manuscripts

Arian Heresy - Roman Catholics claim anti-arian, that they fought wars & destroyed Arian people BUT NO EVIDENCE that the nations that were destroyed because they were "Arian" like the Ostrogoths (one of the 10 tribes out of 3 extinct) or Vandals, that they were refer to Daniel 7. actually Arian, because we have none of their writings.

BUT ALSO Roman Catholics

(gospel for outsiders)

Templar have
2 doctrines

exoteric - NON ARIAN

isoteric - ARIAN = ^{because} The Pope declared the Vulgate as an infallible Bible & the Vulgate removes the deity of Christ

(insiders)

In 1481 AD - vatican manuscript discovered at Vatican Library - the manuscript REPEATEDLY casts aside the Deity of Christ. The date coincides w/ Eusebius writings during time of Constantine

In 1844 AD. The Sinaitic manuscript discovered at Mount Sinai in the monastery of St Catherine. It agrees closely w/ Vatican manuscript by minimizing Deity of Christ/Arian. These were probably 2 of the 50 written by Eusebius during Constantine

In 1881 AD. - Westcott & Hort Greek text introduced, which departed from the Textus Receptus & follows Vatican & Sinaitic corruptions. The Jehovah witness Bible (New World Translation) was translated from the text of Westcott & Hort

good

← Tyndale used Received text (actual manuscripts) → went against the Pope
THIS BECAME A PROBLEM, SO JESUITS WERE CALLED IN

Jesuits said "we must undermine the Bible of the Protestants & destroy their teachings eventually WAR broke out because of this against England

Dean Burgon fought for the red manuscripts & writes, of course the nailed Jesus to the cross, we expect them to do the same with His word.

Westcott & Hort → where all new Bible versions are from

The Textus Receptus is the old Byzantine text w/ hundreds of copies in agreement, written in Koine Greek, of which hundreds of words cannot be translated in classical Greek. The Early Church used Koine Greek versions & rejected Alexandrian versions which were based on Origen (freemason & other gnostic revisions)

SHORT
 ENIED
 ONMENT

the phrase "through his blood" is not found in either Jesuit
